USER INTERFACE DESIGN

EX No: 4 **240701463**

Create a Prototype with Familiar and Unfamiliar Navigation Elements and Evaluate Ease of Use using Proto.io

---

AIM

The aim of this experiment is to design and develop a **Spotify User Interface prototype** using Proto.io that incorporates both **familiar and unfamiliar navigation elements**, and to evaluate the usability of the interface for different user groups.

PROCEDURE

Step 1: Sign Up and Log In

1. Open the Proto.io website: https://proto.io
2. Create a new account or log in using existing credentials.
3. After logging in, the Proto.io dashboard appears.

Step 2: Create a New Project

1. Click **Create New Project** in the dashboard.
2. Enter the project name as **Spotify UI Prototype**.
3. Select the device type **Mobile – iPhone**.
4. Click **Create Project** to start designing.

Step 3: Design the Splash Screen

The Splash Screen is the first screen displayed when the application starts.

Steps:

1. Add a **new screen** and name it **Splash Screen**.
2. Set the background color to **black**.
3. Insert the **Spotify logo** at the center of the screen.

4. Add the **Spotify text/logo branding** below the icon.
5. Add interaction:
    - Trigger: **On Load**
    - Action: **Navigate to Login Screen**

Screenshot

Figure 1: Splash Screen

(The splash screen displays the Spotify logo in the center on a black background.)
This screen can be seen in **page 2 of the prototype export**

Spotify UI Prototype

Step 4: Design the Login Screen

The Login Screen allows users to sign in to the Spotify application.

Steps:

1. Add a **new screen** named **Login Screen**.
2. Insert the **Spotify logo** at the top of the screen.
3. Add text:
    - *Millions of songs. Free on Spotify.*
4. Insert the following UI components:

- Email input field
- Password input field
- **Sign In** button
- **Sign Up** link

5. Add interaction:
    - When **Sign In** button is clicked → Navigate to **Home Screen**

Screenshot

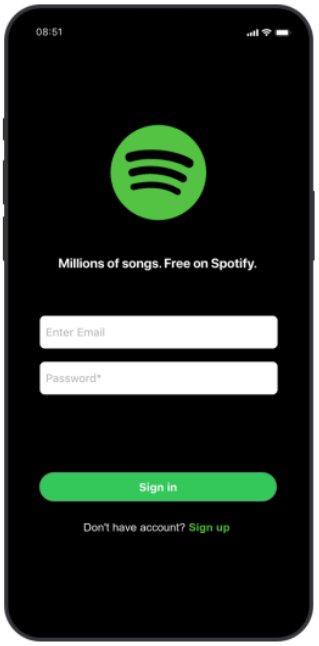

Figure 2: Login Screen

This screen contains the login form with email, password and sign-in button as shown in **page 3 of the prototype export**

Spotify UI Prototype

Step 5: Design the Home Screen

The Home Screen displays music recommendations and playlists for the user.

Steps:

1. Add a new screen called **Home Screen**.
2. Add navigation tabs:

    - All
    - Music
    - Podcasts
3. Add sections such as:
    - **Made for You**
    - **Jump Back In**
    - **Today's Biggest Hits**
4. Insert album covers and playlist cards.
5. Add a **bottom navigation bar** with icons:
    - Home
    - Search
    - Library
    - Profile

Screenshot

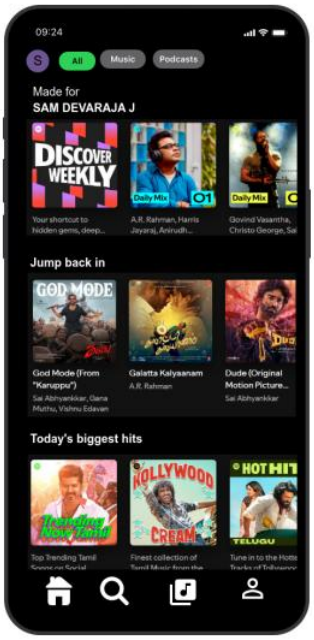

Figure 3: Home Screen

The home page displays personalized music recommendations and playlists as shown in **page 4 of the prototype export**

Step 6: Design the Search Screen

The Search Screen helps users search for songs, artists, or podcasts.

Steps:

1. Create a screen named **Search Screen**.
2. Add a **search bar** at the top with placeholder text:
    - *What do you want to listen to?*
3. Add browsing categories such as:
    - Music
    - Podcasts
    - Live Events
    - I-Pop
4. Add sections:
    - Discover something new
    - Browse all
5. Maintain the **bottom navigation bar** for easy navigation.

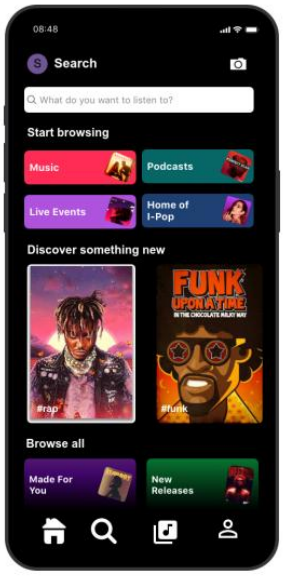

Figure 4: Search Screen

This screen allows users to browse and search music categories as shown in **page 5 of the prototype export**

Spotify UI Prototype

Familiar Navigation Elements Used

1. Bottom navigation bar
2. Search bar
3. Login form fields
4. Buttons and clickable playlists
5. Menu tabs (Music, Podcasts)

These elements are commonly used in mobile applications, making the interface intuitive for users.

Unfamiliar / Advanced Navigation Elements

1. Gesture-based scrolling through playlists
2. Dynamic music recommendation cards
3. Category browsing tiles
4. Swipe-based interaction between sections

These elements enhance the user experience and introduce modern navigation patterns.

Usability Testing

User Groups

The prototype was tested with different groups:

1. **Students (18–25 years)**
2. **General users (25–40 years)**
3. **Non-technical users**

Tasks Given to Users

Users were asked to perform the following tasks:

1. Open the application.
2. Navigate from Splash Screen to Login Screen.
3. Log in to the application.
4. Browse playlists on the Home Screen.
5. Search for music using the Search Screen.

Evaluation Results

User Group	Ease of Navigation	Comments
Students	Very Easy	Familiar with music apps
General Users	Easy	Navigation bar helpful
Non-Technical Users	Moderate	Needed guidance for search features

---

RESULT

Thus, a **Spotify UI prototype was successfully designed using Proto.io**, incorporating both **familiar and modern navigation elements**, and the usability was evaluated among different user groups.
