

BAD DESIGN

1.CREATE A DESIGN WHICH SHOULD BE A BAD DESIGN. AND GIVE REASONS

Reason:

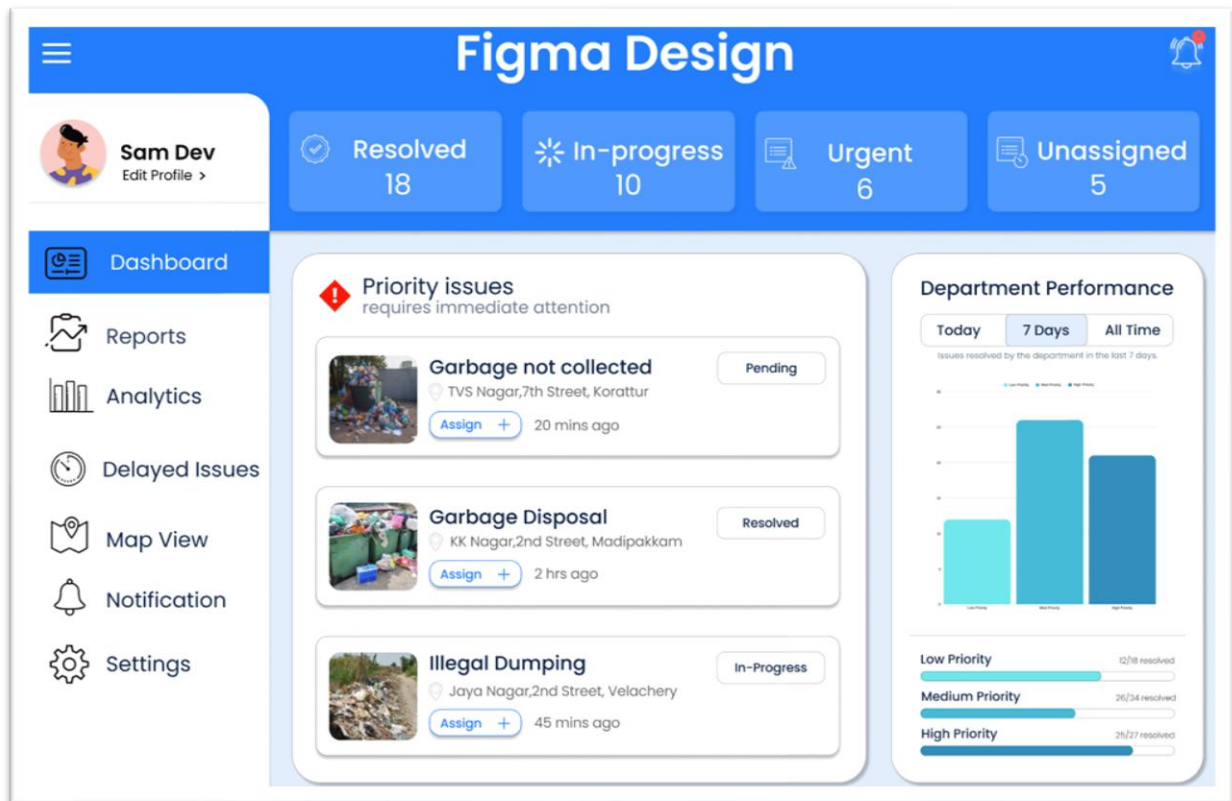

1. Uses poor and harsh colour combinations
2. No clear visual hierarchy
3. Cluttered layout with too many elements
4. Improper spacing and alignment
5. Confusing charts and data representation
6. Difficult navigation and poor usability

Conclusion:

This design creates confusion and provides a poor user experience.

GOOD DESIGN

2. CREATE A GOOD DESIGN AND GIVE REASONS WHY IT IS GOOD.

Reason:

1. Uses clean and consistent color scheme
2. Clear visual hierarchy for important information
3. Well-organized and structured layout
4. Proper spacing and alignment
5. Easy-to-understand charts and data
6. Simple and intuitive navigation

Conclusion:

This design improves usability and provides a good user experience.
