USER INTERFACE DESIGN

EX No: 8 **240701463**

Creating Storyboards for a Mobile Hospital Queue & Appointment System using Balsamiq

---

AIM:

The aim of this experiment is to create storyboards representing the user flow for a mobile **Hospital Queue and Appointment System (MediFlow App)** using Balsamiq.

PROCEDURE:

1. Open the Balsamiq Wireframes tool (https://balsamiq.com).
2. Create a new project for the MediFlow application.
3. Add multiple mobile wireframe screens to represent each stage of the user journey.
4. Use UI components such as buttons, text fields, icons, lists, and navigation bars.
5. Design each screen clearly to show user interaction.
6. Arrange all screens in sequence to represent the complete workflow from login to confirmation.

USER FLOW:

1. Login Screen
2. Department Selection Screen
3. Doctor List Screen
4. Appointment Booking Screen
5. Queue Status Screen
6. Confirmation Screen

SCREEN DESCRIPTIONS:

1. Login Screen

Components:

- Username field

- Password field
- Login button
- Register button
- Forgot password link

Purpose:
To allow users to securely log into the system.

---

2. Department Selection Screen

Components:

- Search bar
- List of departments (Cardiology, Neurology, Orthopedics, Dentistry, Ophthalmology)
- Navigation bar

Purpose:
To help users choose the required medical department.

---

3. Doctor List Screen

Components:

- Doctor names
- Specialization and experience
- Book Appointment button

Purpose:
To display available doctors for selection.

---

4. Appointment Booking Screen

Components:

- Doctor details
- Calendar for date selection
- Time slot selection
- Proceed button

Purpose:
To allow users to schedule an appointment.

---

5. Queue Status Screen

Components:

- Token number
- Patients ahead
- Estimated waiting time
- Confirm button

Purpose:
To show real-time queue details.

---

6. Confirmation Screen

Components:

- Confirmation message
- Token number
- Doctor name
- Date and time
- View appointments button

Purpose:
To confirm successful appointment booking.

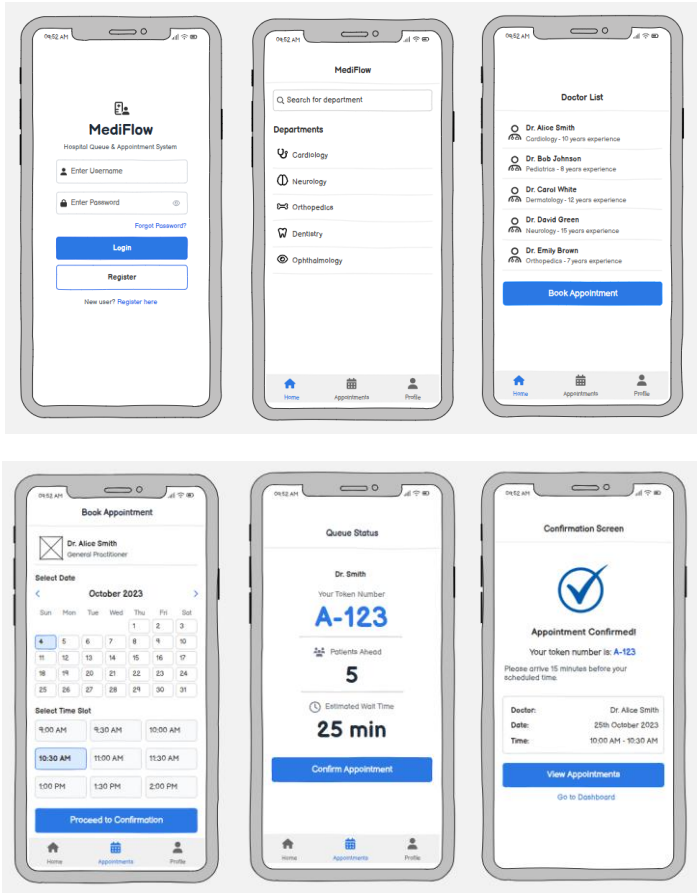

Figure: MediFlow App Storyboard Screens

RESULT:

The storyboard for the MediFlow Hospital Queue and Appointment System was successfully created using Balsamiq. The user flow clearly demonstrates the process from login to appointment confirmation, ensuring a smooth and user-friendly experience.
